Glossary

Definition of commonly used terminology and formatting features.

Start Center Portlets Overview

A portlet is configurable window that provides quick access to applications and actions, and an at-a-glance view into data specific to the job function (role) of an individual.

Application Queries

The following queries are available for the Team Lead role in the Work Order Tracking (BRDA) Application.

Glossary

Please find a definition of commonly used terminology and formatting features below.

Terminology	Definition
Process	The business process model referenced used to complete the Scenario.
Role	The system level role which is required to complete the Scenario.
Scenario	The task achieved within the given chapter.

Start Center Portlets Overview

A portlet is configurable window that provides quick access to applications and actions, and an at-a-glance view into data specific to the job function (role) of an individual.

Portlet Description	Purpose
Work To Accept	Returns all work orders at the Waiting Review status to be accepted or rejected into the workbank.
Work to Assign	Returns work orders that have been Planned & Scheduled so Labor assignments can be created.
Assigned Scheduled Work	Returns work orders that have been Planned & Scheduled and Assigned at the Scheduled status.
Work In Progress	Returns all work orders at the In Progress status.
Work On Hold	Returns all work orders at the On Hold status
Work Completed Awaiting Review	Returns all work orders at the Completed Awaiting Review status i.e. been completed by the Maintainer. The work orders now need to be reviewed and approved for Completion or Rejected if either, data needs to be updated on the work order or the actual work on site is not complete.
TANC Pending Approval	Returns all work orders where a Temporary Acceptance of Non Compliance (TANC) has been applied for.
TANC Extensions Pending Approval	Returns all work orders where an extension of a Temporary Acceptance of Non Compliance (TANC) has been applied for.
